Spring 2017

Wednesdays 11:00-1:50

This course is designed to help you (1) recognize ethical ‘principles’ and logics which guide and influence your behaviors and actions in groups and organizations; (2) provide opportunities to inform and/or change the moral bases which influence your actions; (3) recognize ethical issues in organizations before they become serious problems or even crises, and (4) understand and act from principled reasoning in groups and organizational situations in order to be more helpful to others and prevent harmful consequences. The course is also intended to increase your understanding of how business ethics complements legal compliance at personal, group, organizational, societal and international levels. Methods include readings, cases, videos, guest visits, and class interactions.

Course norms:

(1) Get personally and professionally involved and be prepared before each class.
(2) Be proactive in class ‘question & answer’ and discussions.
(3) Show respect and be constructive in classroom discussions.
(4) Cooperate and build individual and class morale and productivity.
   Actively contribute and add value to class discussions the readings and class dialog. Arguing arbitrarily without being prepared is unproductive;
(5) Ask, if you don’t understand; move the class discussion and collective wisdom forward.
(6) Share and make yourself known to classmates.
(7) Use this class as a laboratory to test out your professional experiences, aspirations, and knowledge regarding your industry, company, and career. Ethics involves emotion as well as reason, logic, and principles.
Class rules:
- Be on time for class. Two absences result in a lowering of the final grade.
- Do not leave class before breaks. Coming and going is distracting.
- Eat before and after class, not during. Bring food in is disruptive.
- Purchase required materials.
- Always see me about any question, issue you have. I welcome your openness.
- Laptops and mobile phones should be closed and are not to be used during class discussion and presentations, unless you are referring to an online text. Your full attention is required.
- Missing one requires you to hand in the assignment before or after the absence.

Course Description:
While the course centers on the person/individual, it also relates individuals to these areas:
(1) Professional ethics, values and issues;
(2) Group and team ethics;
(3) Company and industry ethics. Issues, and opportunities;
(4) Societal and International ethics, issues and opportunities;

Intensive Course:
This course is structured to maximize individual and team work. It is also based on these premises:
(1) You are or may get excited about understanding ethics as an important force in your professional and personal life,
(2) A more dynamic understanding of business ethics may encourage you to address organizational people and decisions differently,
(3) You are ready and willing to read, write, research, and use your organization—or one you select—to apply course topics for research and learning;
(4) You will have read each assignment and show preparedness in class discussions, and have the option of cooperating with a teammate(s) for the final project assignment.

The course uses a text and several handouts. However, your research and on-line searches will add value to your presentations and final case/analysis. The class methods include: short lectures, class brainstorming, dialogue, team work, role play, videos, structured discussion, on-line searches, and power point presentations.

Note: Some readings may be changed or rearranged during the week.

Required Text:
*Business Ethics, A Stakeholder and Issues Management Approach 6th ed.* by Joseph Weiss (Berrett-Koehler 2015). (Previous editions not applicable). Books can be ordered directly from Berrett-Koehler or Amazon.

Evaluation:

Final Case+Analysis: 30%  Case + Analysis

- Select a contemporary company/organization that you can provide reliable and accurate, documented research/observations on. The cases will be due as announced on the date after the final class. Presentations on your research-to-date + analysis
using the text of your company/organization or societal issue w/analysis is due the last two sessions of class.

• Your case must be contemporary, original and deal with selecting an industry and a company in that industry. You may also select a contemporary societal issue that can be analyzed using the text to analyze stakeholders and issues frameworks.

• Your case or societal issue report + analysis must be objective, realistic, documented, and contemporary (2016-17). Plan on 8-10 double-spaced pages for PART I, the stand-alone case, and than 4-8 pages for PART II the ethical/organizational analysis, (“What happened, to whom, and why”—using chs.1, 2, 3 (and other relevant frameworks, concepts, findings) from the text). Part II enables you to demonstrate that you can use frameworks, methods, insights from the text. Go for coverage and relevant use of as many text insights/concepts/methods that you can.

• Include DETAILED footnotes inside text and a References page at the end. Points counted off paper if for all footnotes & references in Reference section you do not have the (1) author(s)—first and last names, (2) article/book title, Volume and Issue number ALL articles, (3) date—year, month—of publication, the PAGE NUMBERS (4)Web address + Author/title/volume, issue/dates/page numbers of article INSIDE the WEBSITE.

Choice of Final Team/Dyads Presentation/Paper Topic Criteria:

1- Contemporary? If not, updates that are significant with new references
2- Interesting and relevant to text or related topics?
3- You did a search for credible and sufficient resources to write a paper and analysis
4- Your topic is complex enough but “doable” to write and analyze a paper
5- Your paper and topic are comparable in quality and style to cases in the text
6- Your could deliver your paper to the organizational/company/industry and they would approve of your objectivity
7- Your paper could compete for Hoffman Ethics Prize

Paper Tips and Suggestions:
(Follow the Part I and Part II organization of the paper listed in syllabus)
1- Create an interesting, relevant title
2- Type up an outline with major headings and subheadings to organize your research before you start writing
3- Ensure that you type inside the text of the paper references and quotes you used; If you wish to make these footnotes, do so.
4- Then, create the end-of-paper References: Use format from one of the text cases. Be sure to have the author, title of article/book, source (volume, issue number if an article), and page numbers—do not type in the url or website only! Be sure to include the details listed here
5- Proof read the paper for grammar, flow, organization

PRESENTATION OUTLINE suggestions:
1- Introduce your title of paper and yourselves; Why did you select this topic?
2- Part I: Show your title and an outline of your paper/case;
   Briefly explain your major findings and importance;
   Show your references
3-Part II: Show the frameworks you are using and other concepts that help you explain your analysis; Summarize what you learned from this exercise
