Call for Papers for a Special Issue – Academy of Management Perspectives (AMP)

ECHOES OF THE PAST: CAPTURING THE INFLUENCE OF LEGACY ON INDIVIDUALS, FAMILIES AND ORGANIZATION

Submission deadline: August 30, 2023

See this Call on the AOM website

BACKGROUND

This Special Issue aims to explore the notion of legacy and the various ways it has been imagined through research on endowment, imprinting, reputation, morality, wisdom, identity, and traditions.

We define legacy as a persistent, immaterial trace of the past that exerts enabling or constraining effects in the present. We distinguish legacy from its artifacts (physical artifacts – such as buildings, land; verbal – such as stories; visual – such as pictures, movies; or symbolic – such as rituals, names). We hold that the primary components of legacy are psychological – legacy being made of varying cognitions – knowledge, beliefs, values, and norms, which are embedded in the receivers’ long-term memory through a process of information-processing, encoding/interpretation, and storage. Legacies are trans- (from the root word in Latin – across, beyond, through) actional, involving both senders and receivers. Legacies are trans-ferred as well as trans-formed, and therefore, we must account for those who attempt to build and send legacy – individuals, families, firms, and those receiving it, who thereby (re)create and (re)animate legacy over time. Because legacy fuels individual, family and organizational identities, legacy might be strategically leveraged by organizations to attract and secure varying resources. Does legacy help to scale stakeholders’ engagement, and if so, through which mechanisms?

Legacy is one of the most important yet least understood constructs of management research and practice. It has been investigated through varying theoretical lenses such as imprinting theory (Jaskiewicz, Combs, & Rau, 2015), organizational memory theory (Foroughi, Coraiola, Rintamäki, Mena, & Foster, 2020), identity development theory (Erikson, 1963), organizational identity theory (Suddaby, Schultz, & Israelsen, 2020), social learning theory (Millová, Malatinová, & Blatný, 2021), career development theory (Achtenhagen, Haag, Hulten, & Lundgren, 2022), and entrepreneurial motivation theory (Fox & Wade-Benzoni, 2017), to name a few. Legacy has been evidenced as a major asset of long-lasting organizations such as family businesses (Barbera, Stamm, & DeWitt, 2018), fueling organizational continuity (Suddaby & Jaskiewicz, 2020), innovation (De Massis, Frattini, Kotlar, Petruzzielli, & Wright,
2016; Erdogan, Rondi & De Massis, 2020), and ethical decision-making (Fox, Tost, & Wade-Benzoni, 2010). Mostly depicted as a positive organizational asset reflected in the organizations’ strategy (Harris & Ogbonna, 1999), brand (Lacroix & Jolibert, 2017) and market position (Plattfaut & Koch, 2021), legacy catalyzes distinctive and enduring identities (Crosina & Gartner, 2021), consolidates legitimacy (Mitchell, Agle, Chrisman, & Spence 2011), and provides a higher sense of purpose and a deeper sense of meaning for people and organizations (Hammond, Pearson, & Holt, 2016). Conversely to these positive contributions, legacy has been also acknowledged as a source of constraint in the present (e.g., Dacin, Dacin, & Kent, 2019), leading to organizational inertia (Hannan & Freeman, 1984; Rumelt, 1994).

Besides furthering ways to better understand how legacies provide beneficial paths towards positive futures, we believe that research is needed to determine how organizations break or modify legacies to succeed in dynamic markets and overcome damaging stakeholder relations and toxic governance. Past routines, habits, and traditions may exert limiting and coercing effects on new generations (Radu-Lefebvre, Lefebvre, Clarke, & Gartner, 2020), affecting their ability to identify new opportunities and elaborate innovative solutions to address unforeseen challenges (Suddaby, Coraiola, Harvey, & Foster, 2020). Such changes in relation to the past might only be possible to achieve with the support of others, which suggests legacy as a primarily relational construct calling for a deeper understanding of the role of stakeholder engagement in past conservation and change.

In sum, despite decades of knowledge accumulation in this area, our understanding of the enabling and constraining effects of legacy is still in its infancy. The literature on legacy brings into focus varying conceptualizations, actors, and mechanisms without offering a systematic identification and characterization of legacy motives, benefits, and constraints, which explains why we still lack a consolidated understanding of “who sends legacy” (legacy senders), “who receives legacy” (legacy receivers), “why legacy is sent”, “with what effects”, and in “what contexts.” As a result, insights into how the past influences the present remains a challenge for advancing both theory and practice in organizational settings and beyond.

**KEY TOPICS**

The Special Issue seeks scholarly papers that engage with theory development and policy implications on the topic of legacy. We encourage conceptual and empirical contributions focused on, but not limited to, the following themes:

- **What** kinds of legacies enable positive or negative impacts on individuals, organizations, society and the environment, social and environmental growth?
- **Why** is a legacy transmitted? Why are legacies accepted or rejected? What are the motivations of legacy senders such as founders to create legacies? What does the role of generativity play in triggering legacy intentions (Faßbender, Wiebe & Bates, 2019)? What is the role of performativity (e.g., Austin, 1962; Barad, 2003) in shaping legacies? Why are certain legacies accepted or rejected by individuals, families, businesses?
• How is legacy transmitted and received? Is legacy always intentionally shared and what is the degree of control that legacy senders can exert over the process of legacy transmission? What are the mechanisms enabling the transfer of legacy (e.g., role modeling, persuasion, learning)?

• Who sends and who receives legacy? Legacy always has a sender, an identified source. Who is that source and what are their characteristics? Is it always intentional? Who are the legacy receivers of that source? Does a legacy survive only if a legacy receiver is willing to accept it (in some form) and to cultivate it over time?

• What are the effects of sending and receiving legacy? Legacy can be a source of pride and identity, but also restrain freedom of choice and behavior. Legacy can also be negative, a brand that an individual or organization must carry. What are the enabling and the constraining effects of legacy in succession? How does legacy contribute to organizational continuity and change? What are the dark sides or unintended consequences of legacy? Under what conditions will legacy help or harm people and organizations?

• Where and when are legacies transmitted and received? What are the socio-material and temporal micro-, meso- and macro-contexts explaining the circulation of legacy over time? Are certain cultures more sensitive to preserving legacy? Are different places and circumstances more conducive to long-lasting legacies? What are the circumstances that lead to a legacy’s collapse?

PAPER STYLE
1. Scholars are reminded that AMP seeks papers that advance theory and contribute to policy (broadly defined).
2. We welcome conceptual and qualitative (e.g., narratives, multiple cases, experiments) papers, but note that AMP is neither a theory-tested nor a mathematical modeling journal.

SPECIAL ISSUE EVENT
Post-submission: The guest editors will organize a hybrid special issue Paper Development Workshop (PDW) at mid-March 2024 at Audencia Business School (Paris campus, France). Authors who receive a “revise and resubmit” (R&R) decision on their manuscript will be invited to attend this post-submission workshop. Participation in the workshop does not guarantee acceptance of the paper in the Special Issue and attendance is not a prerequisite for publication.

SUBMISSION PROCESS
• Submission deadline (full paper): August 30, 2023. The ScholarOne submission portal will be open from August 15 to August 30, 2023 (https://mc.manuscriptcentral.com/amp)
• Authors should follow the AMP Manuscript Preparation Guidelines (https://aom.org/research/publishing-with-aom/author-resources/submitting-to-perspectives)
• Articles will be reviewed according to the AMP double-blind review process.
We welcome informal enquiries relating to the Special Issue, proposed topics, and potential fit with the Special Issue objectives. Please direct any questions on the Special Issue to the Guest Editors:

- James Davis, Utah State University (USA), j.davis@usu.edu
- Miruna Radu-Lefebvre, Audencia Business School (France), mradu@audencia.com
- William B. Gartner, Babson College (USA), Linnaeus University (Sweden), wgartner@babson.edu
- Sarah Jack, Stockholm School of Economics (Sweden) and Lancaster University Management School (UK), sarah.jack@hhs.se
- Alfredo De Massis, Free University of Bozen-Bolzano (Italy), IMD Business School (Switzerland) and Lancaster University Management School (UK), Alfredo.DeMassis@unibz.it
- AMP Editor: Gideon Markman, Colorado State University, gid.markman@gmail.com
